Professional Summary

Experienced React Native Developer with a strong passion for mobile application development and creating intuitive, user-friendly UIs. Well-versed in the complete mobile development life cycle, from design to deployment.

Experience

Hero MotoCorp Ltd., Gurugram

May 2023 – Present

Mobile Application Developer

- Built and maintained cross-platform mobile applications (iOS & Android) using React Native with Redux-Saga for state management.
- Improved application performance using memoization techniques (useMemo, useCallback, memo), reduced render overhead and optimized JS–native bridge usage.
- Used profiling and debugging tools (Flipper, Android Profiler, Xcode Instruments) for performance tuning and crash analysis.
- Optimized image loading and caching using FastImage and implemented lazy loading strategies.
- Implemented Atomic Design Pattern to build scalable, reusable UI components and converted Figma designs into responsive React Native UI.
- Integrated RESTful APIs, implemented CleverTap push notifications and in-app event tracking for analytics and user engagement.
- Implemented Firebase Crashlytics and Realtime Database for crash monitoring and real-time data sync.
- Implemented skeleton loaders for smoother UX and responsive layouts following mobile UI/UX principles.
- Generated production builds (APK & IPA) for deployment and conducted TestFlight testing for iOS builds.
- Familiar with Bitrise for automated build pipelines and mobile app distribution.
- Used GitLab and Microsoft Azure for version control.
- Contributed to development and deployment of two production apps: Freedo Rentals and Freedo Champion.

Education

Post Graduate Diploma in Advanced Computing (PG-DAC)

September 2022 - March 2023

C-DAC Noida, India

Bachelor of Engineering (BE) - Mechanical Engineering

Mumbai University
